Notes

Unless otherwise noted, all data are for 2022-23 and include all grades offered by the district.

In most tables, data are displayed only for the three major race/ethnicity categories. For additional race/ethnicity categories, please visit <https://edsight.ct.gov>

State totals are not displayed as they are not comparable to district totals.

Special Education tables reflect only students for whom the district is fiscally responsible.

* When an asterisk is displayed, data have been suppressed to safeguard student confidentiality. Complete data suppression guidelines are available at <https://tinyurl.com/SuppressionPolicy>

N/A is displayed when a category is not applicable for a district or school.

District Performance Index (DPI)

A District Performance Index (DPI) is the average performance of students in a subject area (i.e., ELA, Mathematics or Science) on the state summative assessments. The DPI ranges from 0-100. A DPI is reported for all students tested in a district and for students in each individual student group. Connecticut's ultimate target for a DPI is 75.

Next Generation Accountability Results

Connecticut's Next Generation Accountability System is a broad set of 12 indicators that help tell the story of how well a district/school is preparing its students for success in college, careers, and life. It moves beyond test scores and graduation rates to provide a more holistic, multifactor perspective of district and school performance.

Narratives

School District Improvement Plans and Parental Outreach Activities

During the 2022-23 school year, students attended Explorations from 16 different towns and staff found many students, regardless of grade, had academic deficiencies in basic skills. We used classroom formative tests, STAR 360, and CCSS aligned math assessments to identify students in need of additional support. Teachers had access to data from benchmark testing for all students to use as they planned lessons, created IEP goals, and created classroom Focus Areas. Teachers continued to revise curriculum maps and learning targets to better differentiate and meet the needs of all students. Students showing a weakness in Math received increased Math Lab support in addition to their scheduled math class. In staff meetings, staff discussed student specific needs and planned how best to accommodate them in the classroom.

We also reinstated a schoolwide attendance challenge and offered incentives on a quarterly basis. For this challenge, students above 90% attendance for each quarter earned the option to attend a pizza party off school grounds - we were able to bring almost 50% of the school to one party. Students and staff also planned smaller activities to engage students and the school community, such as spirit week. This year, students and staff dressed up for various themes, such as Class Color Day, Dress-To-Impress, Twin Day and Decades Day; the week culminated in a Halloween Costume contest.

To curb student truancy, we continued a policy where parents were contacted daily by our school nurse and automated system when students were absent. The contact with parents allowed us to have important conversations around attendance. The school Executive Director, assistant principal, social worker, nurse, and one special education teacher worked as members of the achievement committee. The group refined the process to identify and support student truancy; these included earlier intervention strategies, revised letters, student conferences, parent meetings, and referrals to outside agencies. The social worker addressed a range of social-emotional issues, and worked closely with families, teachers, and administration to implement strategies and work on goals related to student IEPs and social-emotional needs. The school nurse and assistant principal also held almost daily meetings to offer support to students and to find ways to improve their grades in the classroom, daily attendance, and to listen to any concerns.

We continued our commitment to supporting the family's role in the education of our students. The "Parent Portal" through Rediker Software allowed parents and students to check grades in all classes in real time, providing transparency and increased communication between parents and staff. We held a family pasta dinner in the spring that was very well attended, and we look forward to bringing this annual tradition back twice a year in each semester. We held a variety of virtual and in-person parent conferences and continued to work with families to ensure that students had access to necessary resources, technology, and connectivity. Parents could come to the school building to pick up necessary supplies. When transportation posed a challenge for parents, administrators and staff delivered required items to student homes. Staff regularly communicated with parents to offer support and guidance on helping their students.

Efforts to Reduce Racial, Ethnic and Economic Isolation

The school provides opportunities for teachers and students to gain awareness of diversity, differences, and personal experiences through our curriculum. This multi-cultural lens helps students form personal connections and reflect on acquired knowledge. The school is welcoming of all races, backgrounds, and sexual orientations; students are free to be themselves and are accepted. For the first time, Explorations offered the CSDE created Black and Latin studies class to 15 students and we plan to run a full class again in 2023-2024.

The location of Explorations in the northwestern corner limits more diverse communities from taking advantage of our school. We placed ads on local radio stations and newspapers, but did not travel to other schools in 2022-23. We hope to partner with schools in 2023-2024 to reintroduce our school program to a wider audience.

We hosted a Spring Enrollment Open house that was very well attended and every family that attended submitted an application for admission. To help our relative geographic isolation, we provide transportation with three bus stops in Torrington for students at a significant expense to our budget.

Our Friday activities offer unique opportunities for our students. Adventure Education takes the place of the standard PE classes with activities including ice skating, biking, kayaking, and hiking. Many geographically isolated students from lower socio-economic backgrounds have never participated in these types of activities; for some, this creates a lifelong interest.

During the 2022-2023 school year, we revised our internship programs (Unpaid Experiential Learning Program and soon a Work Based Education) to provide students with internships designed to give them experience in a future field of employment.

9th and 10th grade students also experience "Academic Enrichment Fridays;" topics include guidance, health, fitness, team building, and remedial and enrichment activities. This year, juniors and seniors also participated in a Friday building rotation. The students covered similar topics with an additional focus on writing resumes and college entrance essays, work safety training, and job interview skills. Our minority population increased from a low of 9.6% in June, 2014 to 22.5% in October, 2022.

Equitable Allocation of Resources among District Schools

As a one building charter school, Explorations allocates all resources in one high school building. The proposed budget of our school is created in late spring by administrators and the board finance committee, voted on by the Governing Board, and is based on full enrollment and funding from the SDE. Adjustments are made after the October 1 count as needed. Grant writing is the greatest supplement to our budget, and we use grants for student and staff need areas. Title I, Title II and Title IV funds are allocated to support programs to support all students. Parents are also essential to aiding our overhead costs. They often provide the school with a variety of products, including paper towels, toilet paper, classroom supplies, and copy paper. Our solar panel project, completed with grant funds in 2019, continues to provide savings on school energy bills as well as enhancing opportunities for integrated units within the Science curriculum.
