Notes

Unless otherwise noted, all data are for 2022-23 and include all grades offered by the district.

In most tables, data are displayed only for the three major race/ethnicity categories. For additional race/ethnicity categories, please visit <https://edsight.ct.gov>

State totals are not displayed as they are not comparable to district totals.

Special Education tables reflect only students for whom the district is fiscally responsible.

* When an asterisk is displayed, data have been suppressed to safeguard student confidentiality. Complete data suppression guidelines are available at <https://tinyurl.com/SuppressionPolicy>

N/A is displayed when a category is not applicable for a district or school.

District Performance Index (DPI)

A District Performance Index (DPI) is the average performance of students in a subject area (i.e., ELA, Mathematics or Science) on the state summative assessments. The DPI ranges from 0-100. A DPI is reported for all students tested in a district and for students in each individual student group. Connecticut's ultimate target for a DPI is 75.

Next Generation Accountability Results

Connecticut's Next Generation Accountability System is a broad set of 12 indicators that help tell the story of how well a district/school is preparing its students for success in college, careers, and life. It moves beyond test scores and graduation rates to provide a more holistic, multifactor perspective of district and school performance.

Clinton School District

Narratives

School District Improvement Plans and Parental Outreach Activities

Clinton Public Schools is committed to establishing an equitable district approach to supporting student academic success and belonging in our school communities. The approach and explanation for how to ensure that all students can and will be successful in their academic pursuits, and become contributors and leaders in our schools is outlined in the 2022-2025 District Strategic Plan. The framework for this effort is rooted in the Strategic Objectives, Goals, and Action Steps which support the creation of equitable learning systems to ensure inclusion, access, and achievement for all students; to provide individualized and personalized learning experiences; to create welcoming and supporting school communities that will foster the safety and well-being of all; and to ensure proper planning, application, and management of resources to attain the district goals. The development of the strategic plan involved a thorough process to engage all stakeholders. Efforts included small group input, surveys, and public forums to discuss and identify what was important and necessary for student achievement and district improvement.

Special education services and supports have been prioritized for funding and expansion to support emerging student needs in learning recovery and mental health supports. The district has increased staffing and adjusted programs and opportunities to support students and families. Staff participated in training in structured literacy, technology, social-emotional wellness, and in improving the quality of individualized education plan development and goal setting. Paraeducator training was expanded to improve the training and skills of support staff to assist with academic improvement and behavior supports. An additional focus was to provide support in the learning and recovery process through parent seminars and parent training sessions.

Re-engagement of students and families was a primary goal and included personal outreach, transitional supports, and frequent monitoring of student attendance. Approaches for students and families were tailored for individual circumstances in an effort to reduce chronic absenteeism and truancy. On site counseling and increased access to clinical mental health supports were utilized to successfully re-engage students academically and socially in our schools. In addition, the district partnered with Clinton Human Services to develop a truancy outreach program that would provide in-home supports in addition to school efforts.

Communication to all stakeholders was accomplished through clear and regular updates to parents throughout the year. The district utilized the school website, virtual and in-person meetings, recorded video communications, and weekly electronic messaging to keep staff and parents informed and engaged related to all aspects of the school and district events and operations. In addition, the district highlighted student and staff accomplishments, awards, events, and innovative learning experiences through its district Facebook page.

Efforts to Reduce Racial, Ethnic and Economic Isolation

Clinton Public Schools benefits from a community that is expanding in its racial, ethnic, and economic diversity. The growing number of English Learners in the district has prompted a shift in programming to meet this need. Staffing has been added to support students learning English, a bilingual transition classroom was established, district communications are sent in multiple languages, and translation services are provided through technology and native speakers. Clinton students continue to have an opportunity to participate in the inter-district magnet schools in New Haven, the Sound School in New Haven, and the Marine Science Magnet School in Groton. Curriculum development is ongoing to ensure that multicultural and inclusive perspectives are embedded in the student experience. A Social Justice Club was formed at the high school and developed various activities for students to engage in social justice topics and causes. In addition, the middle school implemented an advisory program that included concepts of inclusion and belonging, as well as a student club to program activities to support diversity, understanding, and respect for all. The elementary school established an inclusion-based program for students that was embedded in all activities and as a part of the school culture. Outreach and events specifically designed for multilingual families were implemented to engage all parents in our school community. The district responded to student and family economic needs through collective giving, expanding opportunities for breakfast and lunch for all students, and through connecting families to community services and supports.

Equitable Allocation of Resources among District Schools

The district's strategic objectives guide the allocation of resources necessary to effectively implement educational programming and attain its objectives. Enhancing instructional practice, providing high-quality instructional materials, ensuring quality curricular offerings, supporting professional learning for staff, embedding counseling and mental health supports, and maintaining core programs are the priorities for decision-making. The district leadership team and the Board of Education works collaboratively with town leadership to build understanding and support for district budget requests. Cost-containment in budget areas such as transportation, utilities, health insurance, and special education is a priority. Grant funding has been obtained and thoughtfully allocated to meet the emergent needs of the district. The budget development process is open and transparent allowing for public participation and input. In addition, the district annually submits a ten-year plan for capital improvements based on its evaluation of facilities and enrollment in order to ensure budgets and facilities can continue to appropriately support student needs.
