Notes

Unless otherwise noted, all data are for 2022-23 and include all grades offered by the district.

In most tables, data are displayed only for the three major race/ethnicity categories. For additional race/ethnicity categories, please visit <https://edsight.ct.gov>

State totals are not displayed as they are not comparable to district totals.

Special Education tables reflect only students for whom the district is fiscally responsible.

* When an asterisk is displayed, data have been suppressed to safeguard student confidentiality. Complete data suppression guidelines are available at <https://tinyurl.com/SuppressionPolicy>

N/A is displayed when a category is not applicable for a district or school.

Performance and Accountability

District Performance Index (DPI)

A District Performance Index (DPI) is the average performance of students in a subject area (i.e., ELA, Mathematics or Science) on the state summative assessments. The DPI ranges from 0-100. A DPI is reported for all students tested in a district and for students in each individual student group. Connecticut's ultimate target for a DPI is 75.

Next Generation Accountability Results

Connecticut's Next Generation Accountability System is a broad set of 12 indicators that help tell the story of how well a district/school is preparing its students for success in college, careers, and life. It moves beyond test scores and graduation rates to provide a more holistic, multifactor perspective of district and school performance.

Putnam School District

Narratives

School District Improvement Plans and Parental Outreach Activities

The Putnam Board of Education has set the goal of increasing the achievement of all students through shared responsibility between classroom educators and support staff while meeting their individual needs through innovative teaching strategies, vertically aligned curricula, and assessments. The district has created a Professional Development Committee of teachers and administrators. This committee has developed in-service activities that align with Board of Education goals and meet teachers' individual needs. Teachers' professional goals are linked to their evaluation. Teachers are responsible for directing their own professional learning to help achieve their goals. The school district continues to work with national experts in reading and mathematics to improve reading and math instruction for all students. The district has developed a comprehensive SRBI (Scientifically Research-Based Interventions) plan to address all students learning needs. These include academic as well as behavioral needs. To ensure that the needs of special education students are being appropriately addressed, the district voluntarily contracted with SERC to conduct an audit of our special education program this year.

Beginning with the 2021-22 academic year, the district has added professional development time to support PLC meetings and data-driven decision-making. To provide the most accurate picture of student performance, teachers must employ both formative and summative assessments to revise the curriculum, plan for classroom instruction, and monitor students' progress. The district is collaborating with a host of local and state agencies to improve attendance for all students and to provide services for students in need. Given the impact of the pandemic and access to stimulus funds, the district has partnered with Positive Regard to provide an interventionist in each school. The Interventionist will work with students, staff, and families regarding attendance, motivation, and performance. Additional counseling opportunities will also be available to students and families. The district, in collaboration with an outside health agency, runs school-based health clinics for all schools to meet students' dental and behavioral needs. The Putnam Board of Education developed a new strategic plan this year with a representative group of school and community stakeholders. Each school annually submits a school improvement plan linked to the Board of Education goals.

Efforts to Reduce Racial, Ethnic and Economic Isolation

Two goals of the Putnam Board of Education are:

- Advocate for families, enhance communication, foster relationships, and strengthen community partnerships to increase equity and community involvement in the school system.
- While ensuring equity among all students, support families, social and emotional needs of students, and employees through coordinated programs and services.

With that in mind, the Putnam Public Schools continue to provide students with a broad range of opportunities to interact with students of all racial, ethnic, and economic backgrounds. With this in mind, the Putnam Public Schools, the Putnam Family Resource Center, and the Putnam Recreation Department collaborate to reduce economic isolation by making after-school, weekend, and vacation activities and programs accessible to all students regardless of family income. The district funds field trips to expand students' and families' horizons. Students have visited museums, zoos, theater productions, amusement parks, and sporting events throughout the area. The middle and high school allows all students to participate in team sports. Putnam students may attend three area magnet schools and an outside Vo-Ag school. Putnam Middle School participates in inter-district grants designed to expose students to a diverse student population. Putnam students also interact regularly with a multitude of community organizations. As 20 hours of community service is a requirement for high school graduation, students are very active with these organizations.

Putnam School District

Equitable Allocation of Resources among District Schools

The Putnam School District prides itself on providing quality education to all students. In supporting this core tenet of this essential goal, the Board of Education offers a wide array of opportunities allowing students to interact with students both in and outside the district. These opportunities also allow students to interact with various community members. Budget allocations for programs and schools are made on the needs of students rather than on a formulated basis. During the budget process, administrators and Board of Education members work together to ensure all district needs are being addressed in the budget.
