Notes

Unless otherwise noted, all data are for 2021-22 and include all grades offered by the district.

In most tables, data are displayed only for the three major race/ethnicity categories. For additional race/ethnicity categories, please visit <https://edsight.ct.gov>

State totals are not displayed as they are not comparable to district totals.

Special Education tables reflect only students for whom the district is fiscally responsible.

* When an asterisk is displayed, data have been suppressed to safeguard student confidentiality. Complete data suppression guidelines are available at <https://tinyurl.com/SuppressionPolicy>

N/A is displayed when a category is not applicable for a district or school.

Performance and Accountability

District Performance Index (DPI)

A District Performance Index (DPI) is the average performance of students in a subject area (i.e., ELA, Mathematics or Science) on the state summative assessments. The DPI ranges from 0-100. A DPI is reported for all students tested in a district and for students in each individual student group. Connecticut's ultimate target for a DPI is 75.

Performance standards for state assessments and NAEP are set independently. Therefore, one should not expect performance results to be the same across Smarter Balanced and NAEP. Instead, NAEP results are meant to complement other state assessment data. ³Students demonstrate postsecondary readiness through at least one of the following:

- SAT® - meets benchmark score on SAT, Revised SAT or Connecticut School Day SAT
- ACT® - meets benchmark score on 3 of 4 exams (benchmark score varies by subject)
- AP® - 3 or higher on any one AP® exam
- IB® - 4 or higher on any one IB® exam
- Earning three or more non-remedial college credits cumulatively during high school.

⁴Participation Rate equals the number of test-takers in 11th and 12th grade divided by the number of students enrolled in those grades, as a percentage.

Next Generation Accountability Results

Connecticut's Next Generation Accountability System is a broad set of 12 indicators that help tell the story of how well a district/school is preparing its students for success in college, careers, and life. It moves beyond test scores and graduation rates to provide a more holistic, multifactor perspective of district and school performance.

Bristol School District

Narratives

School District Improvement Plans and Parental Outreach Activities

Bristol Public Schools' mission is to "Teach and Learn with Passion and Purpose" and ensure that all students meet our "Vision of the Graduate." Our students will contribute meaningfully and communicate effectively in a global society with cultural humility, self-sufficiency, and a strong academic foundation. We continually engage in cycles of improvement focused on multi-year efforts to develop talent; improve and enhance curriculum, instruction, and assessment; align operational systems; and promote positive climates. We ground our strategic efforts in a shared belief system of high academic achievement; high-quality curriculum and assessment practices; implementation of research-based instructional practices; targeted, strategic, and individualized student support; strong data analysis; and professional collaboration through instructional improvement teams. Our district-level goals inform school-level goals, where school leaders design improvement plans based on student achievement and the district's Indicators of Success. These include graduation rates, AP performance, literacy, and mathematics and science state assessments. This year, the district's strategic goals focused on improving student academic growth and achievement as measured by the SBA and SAT through talent development, curriculum and assessment development, data analysis, organizational effectiveness, school climate, community engagement, and regular school attendance.

As a learner-focused district, Bristol ensures that all students have the opportunity to learn our curriculum as it is written for each grade level, subject, and course, while using students' individualized needs and expectations within the curriculum as the starting point for all instructional decisions. The district continues to follow the systematic implementation of multi-tiered systems of support to ensure that teachers are focused on the expectations for learning within their curriculum. Professional development priorities focused on collaboration among general education and special education teachers, enhancing co-teaching, and refining goals and objectives that are developed for students within their individualized educational plans. Districtwide professional learning included further development of teachers' understanding and implementation of inclusive practices outlined within the Universal Design for Learning and selection of appropriate scaffolds for student learning. All teachers engaged in the professional development of strategies to support multilingual learners.

Bristol families respond annually to a survey providing the district with feedback related to the climate and connectedness of their school environment. Survey results are disaggregated by school and provide important data to support building efforts. This year, schools had wraparound support teams who provided family outreach before, during, and after the school day through daily communication, home visits, and special events such as family math and literacy nights. The wraparound support team provided general and more targeted outreach to those students and families who indicated they needed additional support. The team ensured that each family was made aware of meal services, counseling and other social-emotional resources, and academic support and tutoring available to our students and their families.

Efforts to Reduce Racial, Ethnic and Economic Isolation

Bristol Public Schools views its racially and economically diverse population as an asset and engages in a variety of initiatives to prevent and reduce racial, ethnic, or economic isolation within the school community. Our primary goal has been to improve achievement for all students and close the achievement gap. We have been implementing significant curricular improvement initiatives in ELA and mathematics at all levels, guided by best practices and careful analysis of data. This work included a completely revised elementary mathematics program, as well as an early elementary word study curricular adjustment based on the science of reading. All of the curricula that have been developed in the past year began with a process in which our district Curriculum Planning Council anticipated equity issues in the development of new coursework and provided the curriculum writing committee with guiding questions and points of information to consider as they developed each equitable curriculum. Once written, each curriculum was reviewed by its committee members against a tool measuring our curriculum's impact on achieving equitable outcomes for students.

At the secondary level, Bristol has expanded the Advancement Via Individual Determination (AVID) system which provides students, who may not have set college as a goal and are from student populations underrepresented at the college level, with the academic tools to take more rigorous coursework and develop self-advocacy skills.

Bristol has also partnered with the CTPartners in Educational Leadership to lead administrators and teachers in professional learning around diversity, equity, and inclusion beliefs and practices. A team of administrators and teachers, referred to as our "Equity Champions", design professional learning experiences for teachers at their schools and meet monthly to determine the most impactful knowledge and practices our teachers should learn to better the experiences of our students.

Equitable Allocation of Resources among District Schools

The City of Bristol has experienced a significant change in socio-economic conditions since 2007. Nearly 50% of students are now considered economically disadvantaged. Despite these economic challenges, city funders continue to support the district in numerous ways, including funding positions to ensure the safety and security of our schools and the social and emotional well-being of our students. The needs of Bristol students are defined by a variety of data including student achievement in reading and math, percentage of economically disadvantaged students, English language learners, and the specific needs of students receiving special education services. Using this data, district, state, and federal resources are allocated to best meet the needs of learners in each school. Staff are allocated among schools based on enrollment and school community needs. School leaders determine the resources necessary to fully implement all approved curricula, meeting the needs of their students equitably. Grant funds are utilized to provide preschool experiences, extended day/year learning programs, fund Family Resource Centers, and better engage parents in their child's education.
