Notes

Unless otherwise noted, all data are for 2022-23 and include all grades offered by the district.

In most tables, data are displayed only for the three major race/ethnicity categories. For additional race/ethnicity categories, please visit <https://edsight.ct.gov>

State totals are not displayed as they are not comparable to district totals.

Special Education tables reflect only students for whom the district is fiscally responsible.

* When an asterisk is displayed, data have been suppressed to safeguard student confidentiality. Complete data suppression guidelines are available at <https://tinyurl.com/SuppressionPolicy>

N/A is displayed when a category is not applicable for a district or school.

Performance and Accountability

District Performance Index (DPI)

A District Performance Index (DPI) is the average performance of students in a subject area (i.e., ELA, Mathematics or Science) on the state summative assessments. The DPI ranges from 0-100. A DPI is reported for all students tested in a district and for students in each individual student group. Connecticut's ultimate target for a DPI is 75.

¹ NAEP is often called the "Nation's Report Card." It is sponsored by the U.S. Department of Education. This table compares Connecticut's performance to that of national public school students. Performance standards for state assessments and NAEP are set independently. Therefore, one should not expect performance results to be the same across Smarter Balanced and NAEP. Instead, NAEP results are meant to complement other state assessment data. To view performance on NAEP by student group, at

³Students demonstrate postsecondary readiness through at least one of the following:

- SAT® - meets benchmark score on SAT, Revised SAT or Connecticut School Day SAT
- ACT® - meets benchmark score on 3 of 4 exams (benchmark score varies by subject)
- AP® - 3 or higher on any one AP® exam
- IB® - 4 or higher on any one IB® exam
- Earning three or more non-remedial college credits cumulatively during high school.

⁴Participation Rate equals the number of test-takers in 11th and 12th grade divided by the number of students enrolled in those grades, as a percentage.

Next Generation Accountability Results

Connecticut's Next Generation Accountability System is a broad set of 12 indicators that help tell the story of how well a district/school is preparing its students for success in college, careers, and life. It moves beyond test scores and graduation rates to provide a more holistic, multifactor perspective of district and school performance.

Narratives

School District Improvement Plans and Parental Outreach Activities

Region 14 district improvement centers around our Vision of A Learner and the development of the skills and habits of mind necessary for students, faculty, and staff to exhibit the six learner attributes of communicating effectively and collaborating, adapting and adjusting, persevering, demonstrating empathy, and thinking critically and creatively. These attributes are developed and refined through professional learning for faculty, robust curricular offerings for students, targeted instruction and intervention to meet individual's needs, and continuous reflection on our practices and outcomes. Furthermore, the following district goals for academic performance, communication, safety, and budget development drive decision-making around district improvement: The district will strive to improve academic performance for all students on multiple assessment indicators and the staff will be committed to continuous improvement; Region 14 will develop partnerships with all stakeholders in the schools community to highlight the exemplary programs the district offers; Region 14 will provide safe and secure facilities equipped with technology, enabling a 21st century learning environment that supports the values of the district; and Region 14 will prepare a budget that meets the needs of every student and communicates the needs and priorities of Region 14 in a clear and concise manner.

Through increased intervention opportunities and support, enhanced instructional strategies, and regular communication between teachers/administrators and parents/guardians, Region 14 schools have improved the programming and services for its students while enhancing relationships with the parents and guardians. Two part-time interventionists at each of the two elementary schools for literacy and math support, a full-time math interventionist at the high school and the middle school, and a literacy interventionist at the middle school and the high school to support both regular education and special education students have been integral to providing data-driven interventions to improve the performance of students currently scoring below grade level on district and state assessments. Student progress in achieving academic and behavioral goals as well as assessment results are communicated with families through individual mailings, phone calls, and password-protected e-blasts, while regular news updates from principals to parents/guardians keep families updated on upcoming events, important dates, and opportunities to get involved in the school.

Efforts to Reduce Racial, Ethnic and Economic Isolation

Region 14's curricula and programming provide numerous opportunities for students to develop awareness of the diversity of individuals and cultures: literature at all grade levels represent a variety of cultures and perspectives; guest speakers at the schools who discuss diverse experiences; school-climate assemblies and events dedicated to promoting kindness and acceptance of others and their differences; and the sharing of information internally and with the broader community via social media outlets in celebration of Hispanic Heritage Month, Black History Month, Pride Month and cultural and religious holidays.

Equitable Allocation of Resources among District Schools

Region 14 is committed to providing comparable financial support to each of its four schools to ensure the resources necessary to improve student achievement are available. All school and district administrators participate in the zero-based budgeting process, revisiting their needs annually to develop a budget that represents the current and projected needs of the students and schools. Emphasis is placed upon district improvement goals and curricular needs as well as student populations in each building, intervention and special education needs, and programming that enhances the educational experience for students. This planning process leads to the preparation and presentation of the budget, then its subsequent adoption and implementation. Throughout the fiscal year, the use of resources is consistently examined to ensure fidelity to the equitable allocation of resources.
