Notes

Unless otherwise noted, all data are for 2021-22 and include all grades offered by the district.

In most tables, data are displayed only for the three major race/ethnicity categories. For additional race/ethnicity categories, please visit <https://edsight.ct.gov>

State totals are not displayed as they are not comparable to district totals.

Special Education tables reflect only students for whom the district is fiscally responsible.

* When an asterisk is displayed, data have been suppressed to safeguard student confidentiality. Complete data suppression guidelines are available at <https://tinyurl.com/SuppressionPolicy>

N/A is displayed when a category is not applicable for a district or school.

Performance and Accountability

District Performance Index (DPI)

A District Performance Index (DPI) is the average performance of students in a subject area (i.e., ELA, Mathematics or Science) on the state summative assessments. The DPI ranges from 0-100. A DPI is reported for all students tested in a district and for students in each individual student group. Connecticut's ultimate target for a DPI is 75.

¹ NAEP is often called the "Nation's Report Card." It is sponsored by the U.S. Department of Education. This table compares Connecticut's performance to that of national public school students. Performance standards for state assessments and NAEP are set independently. Therefore, one should not expect performance results to be the same across Smarter Balanced and NAEP. Instead, NAEP results are meant to complement other state assessment data. To view performance on NAEP by student group, at

³Students demonstrate postsecondary readiness through at least one of the following:

- SAT® - meets benchmark score on SAT, Revised SAT or Connecticut School Day SAT
- ACT® - meets benchmark score on 3 of 4 exams (benchmark score varies by subject)
- AP® - 3 or higher on any one AP® exam
- IB® - 4 or higher on any one IB® exam
- Earning three or more non-remedial college credits cumulatively during high school.

⁴Participation Rate equals the number of test-takers in 11th and 12th grade divided by the number of students enrolled in those grades, as a percentage.

Next Generation Accountability Results

Connecticut's Next Generation Accountability System is a broad set of 12 indicators that help tell the story of how well a district/school is preparing its students for success in college, careers, and life. It moves beyond test scores and graduation rates to provide a more holistic, multifactor perspective of district and school performance.

Narratives

School District Improvement Plans and Parental Outreach Activities

The district has begun exploring ways to make our system learner-centered, which has included engaging learners, parents, employees, and other community members in conversations about reimagining education. Although these learner-centered ideas will continue to be shaped through additional conversations with school-community stakeholders in the future, the five fundamental elements are: learner agency, socially embedded, personalized, relevant, and contextualized, open walled, and competency based. The work also includes empowering learners for life across the domains of academics, wellness, employability, and citizenship, while reinforcing the district's core ethical values. A learner-centered paradigm shift will also serve to dramatically reduce and ideally eliminate the systemic inequities that exist in the current Industrial Age school-centered paradigm. COVID-19 presented unprecedented challenges and opportunities for us to support our learners during the past school year. Outreach to parents and families shifted dramatically to an almost exclusively remote/virtual format for most of the school year due to health and safety protocols on our school campuses. Our teachers and support staff utilized Google Meet and other video conferencing tools to facilitate conversations, conferences, and formal meetings with parents and families. One of the lessons we learned over the past year is how convenient and efficient remote meetings/conferences can be for all participants, and we hope to continue utilizing these technologies to improve communication with parents and families even after in person meetings return to our regular practice. In addition, we have used our website, social media, and ParentSquare platforms to keep parents and families up to date on significant school-level and district-level information related to COVID-19 and other matters.

Efforts to Reduce Racial, Ethnic and Economic Isolation

The district has begun exploring ways to make our system learner-centered, which has included engaging learners, parents, employees, and other community members in conversations about reimagining education. Although these learner-centered ideas will continue to be shaped through additional conversations with school-community stakeholders in the future, the five fundamental elements are: learner agency, socially embedded, personalized, relevant, and contextualized, open walled, and competency based. A learner-centered paradigm shift will also serve to dramatically reduce and ideally eliminate the systemic inequities that exist in the current Industrial Age school-centered paradigm. Populations of learners and families who have historically been marginalized by the prevailing system of education will feel more connected to school and experience more individual success if and when we are able to make this transformation. While that transformational work is taking place, we also continue training related to equity and diversity with assistance from SERC with a specific focus on understanding and addressing issues related to systemic racism. Our schools use skype, pen pal programs, technology, curricular activities and literature to enhance knowledge of diverse cultures. Learners of all ages use technology to connect remotely with students from other states and Canada in order to learn about their schools, cultures and geography. Learners are exposed to the people and traditions of different cultures through cultural arts programs sponsored by the PTO. The Unified Sports program brings together learners with special needs and their peer partners with other Unified Sports teams for soccer, basketball, bowling, track and volleyball.

Equitable Allocation of Resources among District Schools

The allocation of resources begins with the foundation of building a district-wide budget that supports children from the towns of Middlefield and Durham in order to ensure the highest quality educational experience for all children. The budget process is collaborative and actively solicits input from employees, families, and citizens. This process assures that a responsible budget is proposed by the Board of Education and presented to both communities for a vote in May. Prioritization of needs is aligned with the district strategic plan. The collaborative budget process assures that the administrative team works closely together to prioritize needs and assure that there is an equitable allocation of resources across all district schools. A multi-year outlook is used to address identified needs over time.
