Notes

Unless otherwise noted, all data are for 2021-22 and include all grades offered by the district.

In most tables, data are displayed only for the three major race/ethnicity categories. For additional race/ethnicity categories, please visit <https://edsight.ct.gov>

State totals are not displayed as they are not comparable to district totals.

Special Education tables reflect only students for whom the district is fiscally responsible.

* When an asterisk is displayed, data have been suppressed to safeguard student confidentiality. Complete data suppression guidelines are available at <https://tinyurl.com/SuppressionPolicy>

N/A is displayed when a category is not applicable for a district or school.

Performance and Accountability

District Performance Index (DPI)

A District Performance Index (DPI) is the average performance of students in a subject area (i.e., ELA, Mathematics or Science) on the state summative assessments. The DPI ranges from 0-100. A DPI is reported for all students tested in a district and for students in each individual student group. Connecticut's ultimate target for a DPI is 75.

¹ NAEP is often called the "Nation's Report Card." It is sponsored by the U.S. Department of Education. This table compares Connecticut's performance to that of national public school students. Performance standards for state assessments and NAEP are set independently. Therefore, one should not expect performance results to be the same across Smarter Balanced and NAEP. Instead, NAEP results are meant to complement other state assessment data. ²The Connecticut Physical Fitness Assessment (CPFA) is administered to students in Grades 4, 6, 8 and High School (HS). The health-related fitness scores gathered through the CPFA should be used to educate and motivate children and their families to increase physical activity and develop lifetime fitness habits.

³Only students assessed in all four areas are included in this calculation.

Next Generation Accountability Results

Connecticut's Next Generation Accountability System is a broad set of 12 indicators that help tell the story of how well a district/school is preparing its students for success in college, careers, and life. It moves beyond test scores and graduation rates to provide a more holistic, multifactor perspective of district and school performance.

Narratives

School District Improvement Plans and Parental Outreach Activities

Chaplin Elementary School offers support services for any student in need of Tiered intervention for either academics or behavior. CES has two full-time interventionists, one dedicated to Math and one dedicated to ELA. Each class has a dedicated, daily intervention time for Math as well as a time for ELA. Our schedule provides teachers with vital weekly data time to collaborate with interventionists, administration, and support services in order to use data to guide and analyze numerous data points and determine which supports students should receive through Tier 3 and Tier 2 interventions. A Board-Certified Behavior Analyst joined the CES staff this year to work alongside the school psychologist to observe students, make recommendations to teachers, to participate in PPTs as well as 504 meetings, and to provide professional development to the staff in the area of behavior and classroom management.

Our Special Education Team meets weekly with the Director of Special Education to assess current academic programs and behavioral programs, student progress, staff and resource utilization at CES. Understanding the importance of home- school communication and support, all staff members, working with students, communicate regularly with parents to update them of student progress on their individualized goals.

Regular communication with the parents and guardians from the administration, the school nurse, and classroom teachers allows the school and families to discuss many topics including the importance of attendance. Prioritizing a community in which all students have a sense of belonging and acceptance, our monthly core values guide our instruction in personal responsibility. This has given students a better understanding of the expected behaviors in all school environments resulting in self-motivation to be in school to do the best that each student can. Expected behaviors are discussed with Parents.

For the second year, CES was unable to conduct in-school Family Event Nights this past year due to the pandemic. Staff have sent home class newsletters with suggestions for families to work with their children at home. Teachers have also increased personal communication with families to give specific feedback about student growth and ways to work at home. CES continued to conduct the One School, One Book project in which all families receive a copy of a chapter book that is read for a period of two weeks. Staff make videos for families to follow along with the reading at home if they so choose. Individual classrooms have also developed activities that go home with the students for a short period of time to engage the family in reinforcing the skills and concepts being worked on in school. Home activities rotate among the students throughout the school year.

Our efforts to include parents in decision making continues to increase as all stakeholders better understand the importance of a collective endeavor to help the students reach their potential. Information collected from numerous parent surveys guided us in providing for our families throughout the school year. The surveys also provided guidance for professional development for the staff. Newsletters were sent to parents that explain our standards referenced report card as well as to explain NWEA scores. Parents were invited to schedule time to meet with teachers or school administration.

Efforts to Reduce Racial, Ethnic and Economic Isolation

Chaplin Elementary School is a Pre-K through Grade 6 School, located in the northeast corner of Connecticut. The school has a population of 159 students, with 16% of the student population having a diverse ethnic background. The school population has increased by a small number again and has brought more students with a diverse background.

Our fifth-grade class participates in a program that matches them with a class from a different town in Connecticut. This allows our students to hear from and work with students of a different background. These experiences open the eyes of students to topics such as biases and prejudice.

As the school shifted its reading program this year, more literature was introduced to students that shares the diversity of the USA and the world. The different literature informs our students about the impacts of the actions of people on society as a whole and to the groups that may be targeted. Readings have given the students background knowledge that allowed them to use compassion and empathy as well as realize that people of all types have similar needs to maintain safe environments and to be a part of the same local community.

Chaplin Elementary School qualified again for free breakfast and lunch for all students. Maintaining an awareness to our student and family needs this year was critically important as we cooperated with outside groups to provide for families in need. The CES Leadership Development and Education Program teaches students in grades three through six the importance of community. Students led the way in conducting food banks, collections, and fund raisers to provide for community members in need. The work done by the group helps our students to see the benefits of neighbors helping neighbors.

The students of Chaplin have the option of enrolling in the local inter-district magnet school which selects students by lottery.

Equitable Allocation of Resources among District Schools

Chaplin is a one school district. Responsible use of funds ensured equal access to digital resources for all students by maintaining a classroom one-to-one digital environment. All resource staff are available to work with students in every class Pre-K through grade six as well as to consult with both certified and uncertified staff in order to give all students an equal chance for success across all avenues. Chaplin Elementary School held a Summer Learning Academy prior to the beginning of this school year. This gave students the opportunity to maintain their skills and to move forward on skills in which a gap had been created. This year, CES held an after-school learning academy for students in grades 1-6 in order to give those students a little more attention in the areas of ELA and Math.
