Notes

Unless otherwise noted, all data are for 2022-23 and include all grades offered by the district.

In most tables, data are displayed only for the three major race/ethnicity categories. For additional race/ethnicity categories, please visit <https://edsight.ct.gov>

State totals are not displayed as they are not comparable to district totals.

Special Education tables reflect only students for whom the district is fiscally responsible.

* When an asterisk is displayed, data have been suppressed to safeguard student confidentiality. Complete data suppression guidelines are available at <https://tinyurl.com/SuppressionPolicy>

N/A is displayed when a category is not applicable for a district or school.

Performance and Accountability

District Performance Index (DPI)

A District Performance Index (DPI) is the average performance of students in a subject area (i.e., ELA, Mathematics or Science) on the state summative assessments. The DPI ranges from 0-100. A DPI is reported for all students tested in a district and for students in each individual student group. Connecticut's ultimate target for a DPI is 75.

¹ NAEP is often called the "Nation's Report Card." It is sponsored by the U.S. Department of Education. This table compares Connecticut's performance to that of national public school students. Performance standards for state assessments and NAEP are set independently. Therefore, one should not expect performance results to be the same across Smarter Balanced and NAEP. Instead, NAEP results are meant to complement other state assessment data. To view performance on NAEP by student group, at

²The Connecticut Physical Fitness Assessment (CPFA) is administered to students in Grades 4, 6, 8 and High School (HS). The health-related fitness scores gathered through the CPFA should be used to educate and motivate children and their families to increase physical activity and develop lifetime fitness habits.

³Only students assessed in all four areas are included in this calculation.

Next Generation Accountability Results

Connecticut's Next Generation Accountability System is a broad set of 12 indicators that help tell the story of how well a district/school is preparing its students for success in college, careers, and life. It moves beyond test scores and graduation rates to provide a more holistic, multifactor perspective of district and school performance.

School District Improvement Plans and Parental Outreach Activities

Samuel Staples Elementary School: During the 22-23 school year, Samuel Staples Elementary School (SSES) focused on three priority goal areas for their school improvement plan: increasing teachers' use of high impact instructional strategies, improving student learning outcomes, and improving students' and parents' responses in some areas of the annual School Climate Survey. Teachers and administrators engaged in regular post observation discussions about the strategies that had been shown to improve student achievement. End-of-year grade level goal targets were set for reading, writing, and math measures, and most teachers created goals of their own around these targets, providing many opportunities to analyze student growth. Additionally, we engaged the Great School Partnership to work with the staff on strategies for building trusting, collaborative relationships. We used our Morning Announcements, among other things, as a platform to state and reinforce expectations for respectful interactions, while the Safe School Climate committee focused on activities for how students might locate trusting adults in the school. In terms of parental outreach during the 22-23 school year, we maintained an active PTA that worked in partnership with the school, encouraging parents to get involved and support school and district initiatives. They wrote a biweekly SSES SCOOP Newsletter in which they reported on town, school, and district events. We invited families to a "Meet the Teacher" the day before school opened in the fall, and the parents returned a few weeks into the school year for "Back to School Night" when parents had the opportunity to learn about classroom routines, curriculum, instruction, and assessment practices for the 22-23 academic year. Teachers were eager to build and sustain strong partnerships with parents. Along with issuing interim reports, two report cards, and hosting two parent-teacher conferences, teachers welcomed parents into the classroom to be guest teachers, help with projects, and celebrate their children's birthdays with a game, story, or craft.

Helen Keller Middle School: During the 22-23 school year, Helen Keller Middle School (HKMS) focused on three priority goal areas for their school improvement plan: increasing teachers' use of high impact instructional strategies (HIIS), improving student learning outcomes, and improving students' and parents' responses in some areas of the annual School Climate Survey. We developed several approaches to achieve these goals involving professional development and progress monitoring. Along with JRMS, HKMS hosted an EdCamp focused on HIIS which was facilitated by both teachers and administrators. We have also conducted ongoing learning walks, from which we collected data related to HIIS and our other SIT initiatives. Our school climate committee has adopted an action research model of change. Students develop projects, based on areas of improvement found in our school climate data, they then assessed their progress by holding student-led focus groups.

Efforts to Reduce Racial, Ethnic and Economic Isolation

Samuel Staples Elementary School: SSES continued to look for and provide meaningful opportunities to increase student awareness of the diversity of individuals and cultures. For close to 20 years now, our commitment to the Open Choice program remains strong. We had 11 students enrolled in grades K-5 for the 22-23 school year. So too, wonderful gains were made in the recruitment and hiring of racial and ethnic diversity of our staff. Student membership to our Diversity Club grew exponentially, hosting its first Diversity Week where club members and parent volunteers read books about diversity, asked questions, and made a connected craft with a variety of classes. Classroom libraries and materials continued to be enriched with instructional materials that match the ethnic backgrounds of the students in each classroom. Teachers have used these materials and a variety of instructional methods to stimulate multiple ways of learning and understanding the differences in people. Teachers have tried to challenge stereotypes and correct misinformation about people through literature, poetry, presentations and songs. Building globally aware, ethnically sensitive, and culturally astute learners are among the most important responsibilities we have at Samuel Staples Elementary School.

Helen Keller Middle School: HKMS also participated in the Open Choice program, this year we have 5 students from outside the district. Our weekly newsletter and podcast has a regular feature addressing our Diversity, Equity, and Inclusion initiatives.

Equitable Allocation of Resources among District Schools

Allocation of resources is determined through an annual process of developing each school's operating budget in the district. Budgetary decisions are guided by the district's strategic commitment to academic excellence, character education, personalized learning and community involvement.

Teachers provide input to their principals who work collaboratively with the Director of Finance that reflects each school's mission. The budget is proposed publicly at meetings conducted by the Board of Education, where members of the public are invited to provide input. Allocation of resources is discussed at monthly Board of Education meetings. Expenditures are balanced to sustain all academic and non-academic programs and determined in a manner that ensures full participation by members of the staff and full transparency to the community.
