Notes

Unless otherwise noted, all data are for 2022-23 and include all grades offered by the district.

In most tables, data are displayed only for the three major race/ethnicity categories. For additional race/ethnicity categories, please visit <https://edsight.ct.gov>

State totals are not displayed as they are not comparable to district totals.

Special Education tables reflect only students for whom the district is fiscally responsible.

* When an asterisk is displayed, data have been suppressed to safeguard student confidentiality. Complete data suppression guidelines are available at <https://tinyurl.com/SuppressionPolicy>

N/A is displayed when a category is not applicable for a district or school.

Performance and Accountability

District Performance Index (DPI)

A District Performance Index (DPI) is the average performance of students in a subject area (i.e., ELA, Mathematics or Science) on the state summative assessments. The DPI ranges from 0-100. A DPI is reported for all students tested in a district and for students in each individual student group. Connecticut's ultimate target for a DPI is 75.

Next Generation Accountability Results

Connecticut's Next Generation Accountability System is a broad set of 12 indicators that help tell the story of how well a district/school is preparing its students for success in college, careers, and life. It moves beyond test scores and graduation rates to provide a more holistic, multifactor perspective of district and school performance.

Narratives

School District Improvement Plans and Parental Outreach Activities

The vision of LEARN is to ensure that every child has access to high quality public education and opportunities through equitable systems of education, support, and service. To achieve this vision, LEARN bases its district improvement planning on the theory of action that if we consciously commit to a social justice stance, develop equity-focused systems, and eliminate inequitable practices, then we will be able to provide equitable access to and opportunities for all students and staff to be successful.

As a mechanism to support continuous improvement, each school utilizes a school development plan. Plans are developed by leadership teams in consultation with all school stakeholders. LEARN school development plans are based on needs assessment data, aligned to overarching district goals, and strive toward the development of school communities that provide physical and emotional safety, high expectations with a growth mindset, and approaches to instruction that foster engaging learning opportunities. The plans clearly articulate action steps and measurable outcomes that directly support every educator's ability to deliver high quality instruction. Interim indicators of progress enable schools to monitor their progress throughout the school year. Data meetings, short-term goal review cycles, and district retreats engage leaders in reflection on the impact of their plans and any necessary adjustments that are necessary.

LEARN teams also work collaboratively with Local Education Agencies (LEAs) to design and implement appropriate special education services to implement students' Individualized Education Plans (IEPs). The development of IEP objectives are based on standards and individual student needs. Data collection systems are designed and implemented in order to inform progress, make revisions to the IEP, and determine supports and services to ensure all learners have access to a Free Appropriate Public Education (FAPE). To ensure all students have the supports they need, interventions for learning and behavior are designed and closely monitored on a systematic basis. Planning and Placement Teams include LEARN administrators, student support staff, parents, and the LEA. All parents and caregivers of children with disabilities have access to LEARN's Student Support Services (SSS) Department. LEARN SSS staff members meet regularly to receive relevant professional development, analyze case studies, and interact in a rich professional learning community.

LEARN is committed to enhancing and strengthening home-school communication and to providing avenues for parental and caregiver involvement. Each LEARN school provides different avenues of communication for families, including handbooks, newsletters, conferences, visitation days, back to school nights, town hall forums, PowerSchool Parent Portal, and School Messenger which translates messages into the language families identify as their primary language during registration. In the 2022-2023 school year, LEARN will be adding a two-way multilingual communication tool as an added way to strengthen the feedback and communication loop. All parents and caregivers are encouraged to participate in school level committees to support planning and improvement of school-based programs.

Efforts to Reduce Racial, Ethnic and Economic Isolation

LEARN, on behalf of districts across the region, successfully serves students from preschool through 12th grade from 81 districts through its six successful magnet schools, including four schools located on the shoreline of southeastern Connecticut: Regional Multicultural Magnet School (K-5); The Friendship School (PK & K); Marine Science Magnet High School of Southeastern Connecticut (9-12); and Three Rivers Middle College (11 & 12). LEARN also partners with Goodwin University in the operation of two magnet schools on the university campus in East Hartford: Riverside Magnet School at Goodwin University (PK- 5) and the Connecticut River Academy at Goodwin University which continues its expansion to a full grades 6-12 model with the addition of a 7th grade class in the 2021-2022 school year. Together, these magnet schools serve approximately 2,500 students, increasing student achievement in racially, ethnically, and socioeconomically diverse communities.

As a magnet operator, LEARN's schools were created, in part, to address the significant opportunity and achievement gaps that exist within Connecticut's communities. Drawing from 81 communities, LEARN's students are brought together to learn with and from one another in diverse classrooms. LEARN schools engage students in culturally relevant curriculum and instructional practices while building strong relationships with and among students and staff. Every LEARN school engages school-based equity teams in continual self-reflection on ways to dismantle practices that may result in racial, ethnic, and economic isolation through the implementation of equity improvement cycles.

As a RESC, LEARN also developed a proposal to and was awarded an U.S. Department of Education Magnet School Assistance Program [MSAP] grant. This MSAP grant, entitled EXPECT, expands student choice through the development and support of a consortia of inter- and intra-district magnet schools across Eastern Connecticut. The grant has a dual goal of reducing minority group and socio-economic isolation throughout the region, as well as increasing student achievement in the participating schools over a 5 year grant period. Through this grant, LEARN is supporting approximately 3,000 students.

Equitable Allocation of Resources among District Schools

LEARN's schools receive funding from the State Department of Education on a per pupil basis. In addition, each participating district contributes tuition fees. The schools also solicit funds from foundations and grant dollars to supplement educational components. Each school budget is developed by school administration in collaboration with LEARN's central office team. LEARN established the Regional Magnet Advisory Council, which includes Superintendents and district and college leaders from sending towns, to provide input, oversight and to recommend actions to LEARN's Board of Directors. Each school budget is reviewed and approved by LEARN's Board, which is composed of representative members of the Boards of Education of LEARN's member districts, to ensure that each school receives an equitable share. Each inter-district magnet school is funded on a per pupil basis and supplemented with grants such as Title I. The participating schools have the autonomy and authority to allocate resources where they are most needed. Each school is required to consider student learning and social-emotional needs as key priorities, and to develop systems of support to ensure all students thrive.
