Notes

Unless otherwise noted, all data are for 2022-23 and include all grades offered by the district.

In most tables, data are displayed only for the three major race/ethnicity categories. For additional race/ethnicity categories, please visit <https://edsight.ct.gov>

State totals are not displayed as they are not comparable to district totals.

Special Education tables reflect only students for whom the district is fiscally responsible.

* When an asterisk is displayed, data have been suppressed to safeguard student confidentiality. Complete data suppression guidelines are available at <https://tinyurl.com/SuppressionPolicy>

N/A is displayed when a category is not applicable for a district or school.

Performance and Accountability

District Performance Index (DPI)

A District Performance Index (DPI) is the average performance of students in a subject area (i.e., ELA, Mathematics or Science) on the state summative assessments. The DPI ranges from 0-100. A DPI is reported for all students tested in a district and for students in each individual student group. Connecticut's ultimate target for a DPI is 75.

³Students demonstrate postsecondary readiness through at least one of the following:

- SAT® - meets benchmark score on SAT, Revised SAT or Connecticut School Day SAT
- ACT® - meets benchmark score on 3 of 4 exams (benchmark score varies by subject)
- AP® - 3 or higher on any one AP® exam
- IB® - 4 or higher on any one IB® exam
- Earning three or more non-remedial college credits cumulatively during high school.

⁴Participation Rate equals the number of test-takers in 11th and 12th grade divided by the number of students enrolled in those grades, as a percentage.

Next Generation Accountability Results

Connecticut's Next Generation Accountability System is a broad set of 12 indicators that help tell the story of how well a district/school is preparing its students for success in college, careers, and life. It moves beyond test scores and graduation rates to provide a more holistic, multifactor perspective of district and school performance.

Narratives

School District Improvement Plans and Parental Outreach Activities

New Milford Public Schools values strong partnerships with families and the community as a whole. As is the case in any strong relationship, communication is key. Our focus was on school attendance and working with families as our partners. All schools worked to build strong home-school relationships and communicate the importance of regular school attendance and coming to school on time. Both of which are invaluable skills for learning and work beyond school. Our efforts to rebuild and enhance our systems during this time allowed us to work together to achieve the goal of preparing our students for success after they graduate.

The district continued its efforts to bring school-based health centers to all schools. Virtual information sessions were held as we onboarded the additional three sites and Google Sites were linked to our district webpage providing students with the information needed for clinicians to work with students.

The district's Safe School Climate Council met regularly to set goals and address needs related to ensuring students and faculty are provided to achieve positive academic, social, and emotional growth. We want our schools to be welcoming destinations for students, families, and staff who are treated with respect and dignity.

The parent teacher-conference is another way we work to foster our family partnership. The formal conference times provide families with an opportunity to learn more about their child's progress - looking at both strengths as well as areas for growth. While many families have returned to in-person meetings, we have continued the use of video conferences for families for parent-teacher meetings as well as PPTs.

Efforts to Reduce Racial, Ethnic and Economic Isolation

We continued to ensure a safe school climate through district and building-based committees. Using a self-assessment tool, each building set goals to be worked on during the upcoming school year. As a district, a committee comprised of teachers, administrators, parents, and community members was formed, and district goals for climate were identified.

Our work to move to a more restorative approach in addressing students' social and emotional wellness continued. We continued our professional learning and collaborated with other experts to address and work to prevent bullying and mean-spirited behavior. We have also partnered with community agencies on a town-wide campaign to promote kindness.

Staff set goals focusing on social-emotional learning for students. They were committed to helping students grow in self-awareness, self-management, relationship skills, and responsible decision-making. Building and maintaining strong connections with students was necessary. Examples included keeping the Wingman Movement alive at NMHS by designing and implementing activities focused on making connections and discovering our commonalities through the Advisory program. At our other buildings, initiatives were in place to support our efforts to reduce racial, ethnic, and economic isolation. This year, our high school piloted Anonymous Alert in collaboration with our community partner. This online tool allows students to communicate with building leadership and help build a positive and safe school environment.

Equitable Allocation of Resources among District Schools

Data is used to inform our professional learning, as well as the allocation of resources to ensure students' needs are addressed. We have used funding to address students' academic, social, and emotional needs by hiring additional interventionists and school counselors.

Extensive training has occurred at the K-5 level to address the Science of Reading initiative. Budget considerations were made to support purchasing phonics materials and decodable texts. Our teachers continued to receive training and coaching in using small groups and targeted instruction. Math is an area of focus for K-12. Funding for new core materials and funds to support curriculum revision and development at the secondary level have been allotted.

Within the walls of New Milford High School, resources were allocated to each department based on need. For example, the visual arts and sciences require more money to purchase consumable course items. Department heads meet with the building principal to discuss budgetary needs for other items, such as textbooks and equipment. Every effort was made to get departments what they needed to provide an effective and dynamic learning environment.
