Notes

Unless otherwise noted, all data are for 2022-23 and include all grades offered by the district.

In most tables, data are displayed only for the three major race/ethnicity categories. For additional race/ethnicity categories, please visit <https://edsight.ct.gov>

State totals are not displayed as they are not comparable to district totals.

Special Education tables reflect only students for whom the district is fiscally responsible.

* When an asterisk is displayed, data have been suppressed to safeguard student confidentiality. Complete data suppression guidelines are available at <https://tinyurl.com/SuppressionPolicy>

N/A is displayed when a category is not applicable for a district or school.

Performance and Accountability

District Performance Index (DPI)

A District Performance Index (DPI) is the average performance of students in a subject area (i.e., ELA, Mathematics or Science) on the state summative assessments. The DPI ranges from 0-100. A DPI is reported for all students tested in a district and for students in each individual student group. Connecticut's ultimate target for a DPI is 75.

¹ NAEP is often called the "Nation's Report Card." It is sponsored by the U.S. Department of Education. This table compares Connecticut's performance to that of national public school students. Performance standards for state assessments and NAEP are set independently. Therefore, one should not expect performance results to be the same across Smarter Balanced and NAEP. Instead, NAEP results are meant to complement other state assessment data. To view performance on NAEP by student group, at

Next Generation Accountability Results

Connecticut's Next Generation Accountability System is a broad set of 12 indicators that help tell the story of how well a district/school is preparing its students for success in college, careers, and life. It moves beyond test scores and graduation rates to provide a more holistic, multifactor perspective of district and school performance.

Narratives

School District Improvement Plans and Parental Outreach Activities

Preston Public Schools is committed to caring for students, families, and staff in the challenging times as we recover and re-engage from COVID-19 and always. We are dedicated to promoting the growth and development of all students. In recent years, the district has made significant progress in various policy redesigns, physical plant remodels, and technology purchases focused on improving student outcomes. Preston has established a five-year Evergreen Strategic Plan that is now up for review and places student well-being and academic success at the core of its work. The Strategic Plan is in the process of being modified to move Technology to a top priority, just below student wellness, and establish a new five-year plan by December 2023 in coordination with our joint town and district efforts. The district recognizes that with high-quality, fully integrated technology, the district can provide the necessary learning experience for teachers and the essential tools to teach our educators. Our new Technology Plan will also have to be modified as we adjust to the demands of providing full virtual instruction to all students. We have established an innovative partnership LEARN Collaborative to provide tech support five days a week. Several student-oriented directives have been issued, and the district has embarked on an in-depth discussion about race, ethnicity, access, opportunity, equity, and a broad array of policies, procedures, and professional development tasks that emphasize the whole child have been acted on, voted in, or implemented. This work will continue for years to come. The Board of Education has established a policy and a communication committee to facilitate community engagement and share our success. Some of the next steps are the implementation of ClearGov financial software, the community facilities planning committee, the joint strategic planning team, and a multitude of grant opportunities. Over the last school year, the disruption of COVID has lessened, and we have begun to focus on recovery. As we complete the FY22 year, we reinitiated our plans to encourage exemplary performances among students and staff. We offered after-school reading and mathematics programs for struggling learners who have been purposefully identified for that intervention. In addition, Preston Public Schools has actively embraced Scientifically Based Research Intervention and its behavioral counterpart, Positive Behavioral Support Intervention (PBIS), to create a positive atmosphere that encourages academic success. Our Emotional Learning strategy and our internal Social Emotional Equity Learning (SEEL) Team has been enhanced by a full-time social worker. We have also submitted a grant for the coming year that will add more social-worker time to our team.

The adoption of formative assessment programs such as Direct Reading Assessments, STAR Assessment, and Smarter Balanced Individual Assessment Blocks have all helped to create a data-based examination of how to assess student competency and develop appropriate instructional approaches in response to the results obtained from those assessments. As we complete this year, we have set a plan to assess our data trends and to use the trends to create intervention strategies. As part of our student-based analysis, we have also engaged in a national standards assessment through NAEYC.

Efforts to Reduce Racial, Ethnic and Economic Isolation

Preston Public Schools are embedded in a small, relatively homogenous community of approximately 4,800 people. The school district population PreK to 8 is comprised of about 450 students. Preston also cares for approximately 180 high school students that attend surrounding institutions. The district employs a variety of strategies that are designed to reduce racial, ethnic, and economic isolation. The COVID pandemic disrupted our efforts to examine race, access, and opportunity. However, we recently reactivated and reignited this work with an FY22 equity audit. We are engaged with the LEARN Collaborative and its offering: Race, Racism, Equity presentation by Dr. Lee Teitel. We use the Equity Tool Kit established by the Connecticut Department of Education for reference and guidance. We also made available Yale University's Center for Emotional Intelligence work, which includes Dr. Mark Brackett's offer for multiple virtual course offerings on various mental health issues. Recently, we have furthered our efforts by engaging Dr. Linda D'Arcy and Kevin Booker, Jr. to move our efforts forward.

We are in the process of reviewing our Strategic Plan to incorporate what we are learning into our future planning. A partnership has recently emerged with the town of Preston to create a cooperative strategic plan.

At the building levels, all students at the middle school level participate in an Advisor-Advisee program. This program provides a supervised venue for discussing various topics, including racial, ethnic, religious, and economic differences. We have an active Unity Club and we have reinitiated a student government and leadership team at the elementary and middle school levels.

At the PreK -5 level, much of our traditional activities were lost during the pandemic. The school's annual Preston Palooza and Thanksgiving Food Drive are events that engage virtually every student in appreciating the needs of those who are economically challenged and less fortunate. They did not occur due to COVID, but they were restarted this year to great success. There were no assemblies throughout the year.

We offered free meal picks for all students throughout the pandemic and we are advocates for continued free lunch in perpetuity.

Equitable Allocation of Resources among District Schools

Every effort is made to equalize the distribution of resources through the budgetary process and administrative protocols. Several budget process innovations include business case defense of innovation, "acceptable risk," building-based budget allocation, and budget linkage to the strategic plan are being enhanced by the new ClearGov software. These processes help to assure equity in the distribution of resources. A collaborative approach to budget planning is required. It includes the entire leadership team, the building level administrators, the central office, union leadership, staff, and coordination with the First Selectwoman as a budget planning team member. Budgetary decisions are based on curriculum initiatives, safety and security priorities, mental health and wellness, and the overall needs of students.
