Notes

Unless otherwise noted, all data are for 2021-22 and include all grades offered by the district.

In most tables, data are displayed only for the three major race/ethnicity categories. For additional race/ethnicity categories, please visit <https://edsight.ct.gov>

State totals are not displayed as they are not comparable to district totals.

Special Education tables reflect only students for whom the district is fiscally responsible.

* When an asterisk is displayed, data have been suppressed to safeguard student confidentiality. Complete data suppression guidelines are available at <https://tinyurl.com/SuppressionPolicy>

N/A is displayed when a category is not applicable for a district or school.

District Performance Index (DPI)

A District Performance Index (DPI) is the average performance of students in a subject area (i.e., ELA, Mathematics or Science) on the state summative assessments. The DPI ranges from 0-100. A DPI is reported for all students tested in a district and for students in each individual student group. Connecticut's ultimate target for a DPI is 75.

Next Generation Accountability Results

Connecticut's Next Generation Accountability System is a broad set of 12 indicators that help tell the story of how well a district/school is preparing its students for success in college, careers, and life. It moves beyond test scores and graduation rates to provide a more holistic, multifactor perspective of district and school performance.

Narratives

School District Improvement Plans and Parental Outreach Activities

Despite the challenges presented by the pandemic and the implementation of the hybrid and fully remote learning models, Stonington Public Schools District Improvement Plan continues to focus on the development and implementation of standards-based, student-centered curricula in all disciplines preK-12. The district improvement plan includes a three-year acceleration of learning initiative; the goals of improvement in student growth and performance especially focus in mathematics where performance lags. Improving district special education programs are centered on the management of student behaviors and supporting resources and staffing for the area of individualized reading instruction. Primary teachers, reading specialists, and special education teachers continue to engage in professional development with Enhanced Core Reading Instruction to support Tier I and II instruction in foundational reading skills. A cohort of teachers at the elementary and middle school level are also trained in the delivery of the Wilson reading program. Other reading programs including S.P.I.R.E., Just Words, and Rewards Intermediate and Secondary address the targeted needs of students who struggle with various components of reading. The district has expanded and added specialized programs, throughout the elementary schools and middle schools, to meet the needs of students with Autism as well as students who need specialized behavioral support classrooms. Classroom programs include individualized curriculum, BCBA support services, access to assistive technology, and mental health support services. A Learning Annex provides educational programming for students returning from outside placements and also secondary students not finding success in the traditional classroom setting. Students are provided small group instruction in addition to a boat building experience at Mystic Seaport. Administration and staff use a variety of social media platforms, newsletters, websites, and other electronic communication as a means of keeping parents informed on all student-related matters. The district administration provided an increased level and frequency of communications throughout the year to keep families informed on the dynamic teaching and learning environment. All K-12 board approved curriculums are posted on the district website for families to access and use to support learning at home. Due to the impact of the pandemic, many workshops, special events, and meetings are held virtually to inform parents on school-wide initiatives and programs. The high school aggressively targets attendance issues by providing daily increased mentorships for at-risk students to improve attendance in school. Attendance Success Plans for students are developed and implemented before they are identified as chronically absent. A part-time family engagement specialist makes home visits to re-engage chronically absent students as well. A software program that communicates attendance concerns to parents has been effective to improve attendance concerns. Middle school teams track attendance and meet with families and students on a regular basis to improve attendance and address any school avoidance issues. At the elementary level, social workers and administration meet with parents to discuss attendance concerns.

Efforts to Reduce Racial, Ethnic and Economic Isolation

Stonington Public Schools continues to foster student understanding and respect for diverse populations who attend our schools and live in our community. Work specific to Diversity, Equity and Inclusion (DEI) expanded this year based upon the District's Call to Action drafted in July 2020. The district's Anti-bias, Antiracist (ABAR) admin team steers the work for faculty, staff and students and provides professional learning for all educators and administrators. Stonington alumni helped inform this work and contributed to the development of learning opportunities for staff members. At the elementary level, there are positive behavioral support programs that center on developing core values. Through classroom studies, students develop an appreciation for cultural perspective, learning about varied family customs and traditions. The elementary and middle schools implement the Second Step curriculum in grades K-8 to support social-emotional learning and the development of pro-social behaviors. To supplement the Second Step Curriculum, topics of identity, stereotypes, equity and racism are also addressed through the K-12 VOICE program. The appreciation of other cultures and the value of fluency in a second language is reflected by the number of the graduating class (twenty-five percent) at Stonington High School earning the Seal of Biliteracy. The school-based health center works with local agencies to provide programs for students and families on health and nutrition, including mental and physical well-being, healthy food, and meal preparation based on simple, low-cost ingredients. Mental health staff work with students to instill common language and positive behavioral expectations. The use of technology expands access to local and global information, while music and art instruction support cultural studies. Students participate in a variety of service projects to support needs found within our community. The district conducted the Welcoming School Protocol in all school locations with teams of teachers, staff, parents, and students. These teams reviewed the physical plant, policies, and procedures, welcoming staff, and written materials and created an action list to improve welcoming and acceptance across all aspects of the school experience.

Equitable Allocation of Resources among District Schools

Stonington's Board of Education dictates that comparable resources are distributed to each school in the district. Students in each grade, regardless of school assignment, receive equal access to these resources. Budgets are developed annually to address school and district needs. Consideration is given to enrollment figures, class-size, programs, student performance and growth data, curriculum, and district initiatives. The process of budget development at the district level is informed by building administrators' recommendations and contributions to budget discussions. Equitable requests are made to the Board of Education. Monies for supplies, texts, and other academic materials are budgeted on a per-pupil basis. In January, the Superintendent presents a proposed budget to the Board of Education. This is formulated based upon input from building level and district level administrators, as well as input from school-based teams. Public meetings are conducted in January and February as the Board of Education studies financial figures and builds its budget for presentation to the Board of Finance. Input from the community is welcomed and a town-wide referendum is hosted in May.
