Notes

Unless otherwise noted, all data are for 2021-22 and include all grades offered by the district.

In most tables, data are displayed only for the three major race/ethnicity categories. For additional race/ethnicity categories, please visit <https://edsight.ct.gov>

State totals are not displayed as they are not comparable to district totals.

Special Education tables reflect only students for whom the district is fiscally responsible.

* When an asterisk is displayed, data have been suppressed to safeguard student confidentiality. Complete data suppression guidelines are available at <https://tinyurl.com/SuppressionPolicy>

N/A is displayed when a category is not applicable for a district or school.

Performance and Accountability

District Performance Index (DPI)

A District Performance Index (DPI) is the average performance of students in a subject area (i.e., ELA, Mathematics or Science) on the state summative assessments. The DPI ranges from 0-100. A DPI is reported for all students tested in a district and for students in each individual student group. Connecticut's ultimate target for a DPI is 75.

¹ NAEP is often called the "Nation's Report Card." It is sponsored by the U.S. Department of Education. This table compares Connecticut's performance to that of national public school students. Performance standards for state assessments and NAEP are set independently. Therefore, one should not expect performance results to be the same across Smarter Balanced and NAEP. Instead, NAEP results are meant to complement other state assessment data. To view performance on NAEP by student group, at

²The Connecticut Physical Fitness Assessment (CPFA) is administered to students in Grades 4, 6, 8 and High School (HS). The health-related fitness scores gathered through the CPFA should be used to educate and motivate children and their families to increase physical activity and develop lifetime fitness habits.

³Only students assessed in all four areas are included in this calculation.

Next Generation Accountability Results

Connecticut's Next Generation Accountability System is a broad set of 12 indicators that help tell the story of how well a district/school is preparing its students for success in college, careers, and life. It moves beyond test scores and graduation rates to provide a more holistic, multifactor perspective of district and school performance.

Narratives

School District Improvement Plans and Parental Outreach Activities

We are working to build an Antiracist Antibias Montessori school. We have a school improvement plan that focuses on three strategic objectives, creating strong adult community, supporting socially and emotionally well classrooms, and a vibrant learning environment. We are using the following Theory of Action to drive these objectives: If we use culturally responsive practices to build staff self awareness and accountability and frame our social emotional learning, and we strengthen academics with foundations skills with phonics instruction and math fluency and increased strategies for higher order thinking, we will fulfill our education debt and ensure success for all learners.

For our adult community, we have embedded Antibias Antiracist training into our work with our staff, with a focus on theory and practice to create brave spaces and work with Culturally Responsive Pedagogy. We are working hard to engage all our families in this work and in participation at the school. We have built webinars to share the work at school and to create videos of the classroom instruction and practice to better partner with families. Additionally, classrooms share monthly and weekly newsletters, as well as using Transparent Classroom to send pictures and lessons from the day. We plan with families each month in our School Planning and Management Team and quarterly with our Antibias Antiracist Collaborative. We are also partnering with families through conferences and bringing families (virtually) into our school for culture shares, to create a stronger partnership and to have families welcomed to our program as valued and with expertise.

For Social Emotional Learning, we are using ABAR Themes (Identity, Seeing and Celebrating Difference, Justice and Harm, and Activism) to frame our work with Casel skills for Social Emotional Learning and Conscious Discipline strategies, to create strong routines and procedures that foster relationships and safety. We have worked to build our staff's social emotional skills and then built these social emotional skills into our curriculum. This year, we have created student self assessments, so that our learners can guide the curriculum and share what they are learning.

For our Learning Environment, we have regular Professional Learning Communities focused on data and researched based interventions, including a Child Study process. We have implemented a strong phonics based program for all early readers and phonics based interventions for additional support. This year, we have focused our Professional Learning on focused on Culturally Responsive Practices, and we have regular sessions focused on the teaching of reading and writing. We have monthly lesson studies in Mathematics. We have also built in more time for collaborative planning and analysis of student data. For our work with children identified for special education, we work with our SPED team, including our social worker, to implement IEPs, hold PPTs, and provide modifications and accommodations. We work with families to create communication plans, where we tailor communication to the needs of children and to the best communication methods with families.

Efforts to Reduce Racial, Ethnic and Economic Isolation

We are building strategies for connecting to and supporting families. We have built webinars to share the work at school and to create videos of the classroom instruction and practice to better partner with families. Additionally, we have monthly and weekly newsletters from individual classrooms, sharing the work on the week. We also reach out via Transparent Classroom to share pictures and lessons from the day, with descriptions of ways to practice at home. We host family conversations and conferences to provide two way engagement around academic and social learning and strategies. This year, we are working on bringing families (virtually) into our school for culture shares, to create a stronger partnership and to have families welcomed to our program as valued and with expertise.

We are working on building staff skill for Culturally Responsive Relationships and Partnerships. We training and supporting our staff in Home Visits at the beginning of the year, and making time for Culture Shares in the classrooms where both learners and their families share stories, food, and experiences that build relationship and include culture in our curriculum. We are reading Zaretta Hammond's Culturally Responsive Teaching and the Brain and practicing strategies to form deeper relationships with families for the benefit of our learners. We have a number of systems to build collaboration between the school and families. We plan with families each month in our School Planning and Management Team. We also have an Antibias Antiracist Collaborative that meets for family and staff community, discussion, and learning. We use both of these groups to review, revise, and plan for our School Improvement Plan and review data and plan for next steps.

Equitable Allocation of Resources among District Schools

We are a single school district. Therefore, our children are not isolated into different schools based on race or gender. Our school is committed to Anti-Bias and Anti-Racist Education. We have started a community ABAR team that includes leadership, families, and staff, and we use this team to plan for events, review curriculum ideas, and discuss professional learning for staff. We have hosted Undoing Racism training with our larger community and had staff and families attend this weekend long training.

We are focusing our work with staff and students on our ABAR Themes (Identity, Seeing and Celebrating Difference, Justice and Harm, and Activism). We use these themes to organize professional learning around Social Emotional Skills, literacy work with One Book One School (where we all read a book) and curriculum and lessons. We have professional learning each month on exploring the theme, discussing issues of race, gender, and identity that come up and considering how we improve our presentations to our children.

In our classrooms, we are working on using demographics, particularly race, in our breakdowns of disciplinary and academic data and using this data to review and goals.
