#### Notes

Unless otherwise noted, all data are for 2023-24 and include all grades offered by the district.

In most tables, data are displayed only for the three major race/ethnicity categories. For additional race/ethnicity categories, please visit <https://edsight.ct.gov>

State totals are not displayed as they are not comparable to district totals.

Special Education tables reflect only students for whom the district is fiscally responsible.

\* When an asterisk is displayed, data have been suppressed to safeguard student confidentiality. Complete data suppression guidelines are available at <https://tinyurl.com/SuppressionPolicy>

N/A is displayed when a category is not applicable for a district or school.

### Performance and Accountability

#### District Performance Index (DPI)

A District Performance Index (DPI) is the average performance of students in a subject area (i.e., ELA, Mathematics or Science) on the state summative assessments. The DPI ranges from 0-100. A DPI is reported for all students tested in a district and for students in each individual student group. Connecticut's ultimate target for a DPI is 75.

<sup>1</sup> NAEP is often called the "Nation's Report Card." It is sponsored by the U.S. Department of Education. This table compares Connecticut's performance to that of national public school students. Performance standards for state assessments and NAEP are set independently. Therefore, one should not expect performance results to be the same across Smarter Balanced and NAEP. Instead, NAEP results are meant to complement other state assessment data. <sup>2</sup>The Connecticut Physical Fitness Assessment (CPFA) is administered to students in Grades 4, 6, 8 and High School (HS). The health-related fitness scores gathered through the CPFA should be used to educate and motivate children and their families to increase physical activity and develop lifetime fitness habits.

<sup>3</sup>Only students assessed in all four areas are included in this calculation.

### Next Generation Accountability Results

Connecticut's Next Generation Accountability System is a broad set of 12 indicators that help tell the story of how well a district/school is preparing its students for success in college, careers, and life. It moves beyond test scores and graduation rates to provide a more holistic, multifactor perspective of district and school performance.

| Indicator                                                 |                     | Index/Rate    | Target | Points Earned | Max Points  | % Points Earned | State Average Index/Rate |

## Monroe School District

### Narratives

#### School District Improvement Plans and Parental Outreach Activities

The foundation of our district and school improvement plans is based on student learning outcomes as well as survey feedback from the school community. The district continues to build the capacity of all school and district data teams to use multiple sources of data to inform teaching and to refine curriculum that meets the needs of all learners. District and school goals are developed based upon needs in the areas of curriculum, instruction, and SEL. School climate goals are developed based upon survey feedback from students, staff, and families. The district's goals and assessment outcomes all serve as guideposts in determining allocation of resources including professional development offerings. Along with additional training in technology and SEL, all staff members have been instructed in the use of scientifically research-based interventions to support the varied and specific needs of students.

Our district has psychologists and school counselors at all levels. These individuals collaborate with building administrators, the social worker and staff to work with students and families to address students' social, emotional, and behavioral needs. Given the continued impact from the pandemic, this work carried even more significance this year and for the future. Teachers collaborating with school counselors facilitate individual, group, and classroom lesson planning to support the SEL of K-12 students. Our School Resource Officers also partner in these efforts. District-wide training in Yale's RULER has helped to uniform our SEL work PreK-12,

Building relationships between schools and families is a high priority in our district and our community. Each school has a School Climate Committee that analyzes and responds to feedback from students, staff, parents, and the community. The results of these efforts help to improve our school environments and improve student attendance. Additionally, each school maintains a student assistance team that meets regularly to identify and address the needs of students with academic, attendance, behavioral, and social-emotional concerns.

Much effort is placed on building unity and community within our schools. School fairs, family fun nights, and a variety of family outings are planned with the ultimate goal of building a sense of community. We have a district-wide Parents' Council with representatives from each of our school's Parent Teacher Organizations. These groups provide parent volunteers for various school and district committees. Two such examples include our District Curriculum Council, which has parent representatives giving input into curriculum materials and courses, and our district work on the "Vision of the Graduate". The "Vision of the Graduate" is a collaborative effort that involves representatives from all staff and grade levels, administration, local business owners, clergy and government. The goal is to create a vision for the expectations of a graduate from the Monroe Schools and identify the qualities and skills the graduate should have upon completing their education in Monroe. Engaging families in the learning process at our schools starts early and continues at all levels.

#### Efforts to Reduce Racial, Ethnic and Economic Isolation

Monroe's curricula presents diverse cultural perspectives involving a variety of topics and concepts. In curriculum and lesson-plan development, teachers are challenged to consider multicultural perspectives that represent the increasingly diverse demographics of our community. Resources and materials represent a range of perspectives including race, ethnicity, religion, economics, and gender. For example, Masuk High School developed Facing History and Ourselves as well as Diverse Voices in American History courses in social studies to highlight the struggles and accomplishments of diverse peoples and texts of greater diversity are used in the Social Studies and ELA curricula. Plus, we offer the State course African American/Black and Puerto Rican/Latino Studies to students. In addition, the district supports participation in the area's magnet school programs, including Fairchild Wheeler High School, the Six-to-Six Magnet School, the Regional Center for the Arts (RCA), the Educational Center for the Arts (ECA), and the Regional Marine Aquaculture School. The schools also engage in programs designed to build further understandings of differences while emphasizing those human qualities that unite us in the common understanding of what it means to live in peace and cooperation. For example, the district works with the Monroe Rotary to host foreign exchange students and to engage students at all levels in community service and commitment to service above self including a very active Interact Club at the high school. Positive School Climate Committees exist to create a climate where all students are valued. The high school also sponsors a number of clubs (ie- Culture Club, Model United Nations, etc.) that promote diversity. Working with Harvard University's Making Caring Common initiative, the school is actively identifying and addressing the needs of diverse student populations. Districtwide, efforts have been made to highlight different races and ethnicities throughout the school year (ie Black History Month, Hispanic Heritage Month, Women's History Month) to reflect the diversity within our schools, state, and nation.

### **Equitable Allocation of Resources among District Schools**

It is the practice of the district to provide its schools with equitable resources, both in staffing levels and in instructional materials. The district recognizes that comprehensive middle and high school programs are inherently more costly than elementary school programs. The proposed budget is developed with input from the school administrators. When developing their budgets, each principal seeks feedback and requests from each of their departments and grade levels. In meetings with the superintendent, assistant superintendent, and finance director, each principal reviews his or her staffing needs to meet class size guidelines. Principals also present requests to fund needs that are unique to their schools. The district has three elementary schools, and the vetting process is designed to ensure comparable class size, special program offerings, intervention, enrichment, special education services, and equity in the distribution of funds for technology and instructional supplies. The middle and high school principals also meet to review their budgets and present requests specific to the changing needs in their buildings.
