Notes

Unless otherwise noted, all data are for 2021-22 and include all grades offered by the district.

In most tables, data are displayed only for the three major race/ethnicity categories. For additional race/ethnicity categories, please visit <https://edsight.ct.gov>

State totals are not displayed as they are not comparable to district totals.

Special Education tables reflect only students for whom the district is fiscally responsible.

* When an asterisk is displayed, data have been suppressed to safeguard student confidentiality. Complete data suppression guidelines are available at <https://tinyurl.com/SuppressionPolicy>

N/A is displayed when a category is not applicable for a district or school.

District Performance Index (DPI)

A District Performance Index (DPI) is the average performance of students in a subject area (i.e., ELA, Mathematics or Science) on the state summative assessments. The DPI ranges from 0-100. A DPI is reported for all students tested in a district and for students in each individual student group. Connecticut's ultimate target for a DPI is 75.

Next Generation Accountability Results

Connecticut's Next Generation Accountability System is a broad set of 12 indicators that help tell the story of how well a district/school is preparing its students for success in college, careers, and life. It moves beyond test scores and graduation rates to provide a more holistic, multifactor perspective of district and school performance.

Narratives

School District Improvement Plans and Parental Outreach Activities

The Plymouth Public School district-wide goals emphasize the safety and well-being of students and staff. There is a focus on an increased awareness of student well-being, updating and enhancing various curriculums, and developing the instructional capacity of our certified faculty. With regard to instruction, we continued the implementation of our instructional framework, trained our staff on activating a lesson, and providing a well-structured mini-lesson. The District Improvement Team met throughout the school year to evaluate student achievement. They examined various factors, such as student attendance, that had an impact on our achievement results. Additionally, each of our four schools developed a School Improvement Plan that was closely aligned with the District Improvement Plan. Teachers and administrators utilized these plans to develop their individual, departmental, and grade level goals. In the upcoming school year, our district will continue to focus on developing effective MTSS protocols and procedures at all grade levels. This will assist in reducing the number of students being referred for special education services and will help our teachers better support students needing assistance. Also, the district will continue aligning our work to the Strategic Plan and Portrait of the Graduate. This alignment and throughline has been stalled due to the pandemic and has been incorporated into the 2022-2023 professional development plan. Along with the focus on academics and the student learning experience, our teachers will continue to implement our emotional intelligence work in utilizing the "Charter" and "Mood Meter" consistently at all levels. With regard to communication, our four principals sent out weekly email blasts to parents and the superintendent sent timely information when appropriate.

Efforts to Reduce Racial, Ethnic and Economic Isolation

In collaboration with NESDEC, the Plymouth Board of Education engaged in a thorough process to reconfigure the two elementary schools. After receiving parent, staff, and community feedback, the Board of Education shifted from two traditional K-5 elementary schools to a prekindergarten through grade two and a grade three through grade five school. This elementary school reconfiguration took place in the 2021-2022 school year and drastically reduced the racial, ethnic, and economic isolation in our school community. Academically, embedded in our elementary curriculum are appropriate grade level opportunities that expose students to our diverse world. At the middle and high school levels, social studies, world language, and language art teachers introduced students to a variety of cultures and traditions through the utilization of multicultural literature. Our eighth grade curriculum contains a unit on prejudice and human rights and our secondary students also had the opportunity to engage in numerous civic opportunities and events that bring students from surrounding towns together. Additionally, at Terryville High School, opportunities have connected our students with neighboring high schools where they created coalitions towards a culture of leadership, caring, and learning. While there is a higher percentage of children receiving free and reduced lunch that attend the Plymouth Public Schools, the strong support of the community and district collaborative programs assist in providing a supportive and nurturing learning environment.

Equitable Allocation of Resources among District Schools

The Plymouth Public Schools are committed to allocating resources in an equitable manner. The Board of Education goals drive the district and school improvement plans and are the foundation of building a district-wide budget. The budget process is collaborative. Teachers work closely with their building administrators, district leadership teams, and superintendent in order to ensure the highest quality educational experience for our students. This process assures that a responsible budget is created, aligns with our district goals, and supports the needs of our schools. Within this process, the district leadership team reviews data from each school to provide equitable allocation of resources across all district schools and uses the budget development process to realign resources when necessary. For the 2022-2023 school year, we began to utilize a multi-year outlook on the budget to address identified future needs of each school.
