Notes

Unless otherwise noted, all data are for 2022-23 and include all grades offered by the district.

In most tables, data are displayed only for the three major race/ethnicity categories. For additional race/ethnicity categories, please visit <https://edsight.ct.gov>

State totals are not displayed as they are not comparable to district totals.

Special Education tables reflect only students for whom the district is fiscally responsible.

* When an asterisk is displayed, data have been suppressed to safeguard student confidentiality. Complete data suppression guidelines are available at <https://tinyurl.com/SuppressionPolicy>

N/A is displayed when a category is not applicable for a district or school.

Performance and Accountability

District Performance Index (DPI)

A District Performance Index (DPI) is the average performance of students in a subject area (i.e., ELA, Mathematics or Science) on the state summative assessments. The DPI ranges from 0-100. A DPI is reported for all students tested in a district and for students in each individual student group. Connecticut's ultimate target for a DPI is 75.

¹ NAEP is often called the "Nation's Report Card." It is sponsored by the U.S. Department of Education. This table compares Connecticut's performance to that of national public school students. Performance standards for state assessments and NAEP are set independently. Therefore, one should not expect performance results to be the same across Smarter Balanced and NAEP. Instead, NAEP results are meant to complement other state assessment data. To view performance on NAEP by student group, at

Next Generation Accountability Results

Connecticut's Next Generation Accountability System is a broad set of 12 indicators that help tell the story of how well a district/school is preparing its students for success in college, careers, and life. It moves beyond test scores and graduation rates to provide a more holistic, multifactor perspective of district and school performance.

Narratives

School District Improvement Plans and Parental Outreach Activities

The Brooklyn Public Schools (BPS) has a great deal of information available to parents through their website, Facebook and Instagram. Parents who contact the school are welcomed into the school and are greeted by staff who are there to respond to questions & assist them in any way possible. The schools have responded to parental surveys & continue to provide information to families through multiple mediums. Weekly newsletters are sent home with a very large number of resources for parents. BPS is part of the Northeast Early Childhood Council which is a collaborative with eight communities. It serves as the School Readiness Council & brings statewide resources to our families & educators. Students who receive special education services/in the referral process are provided resources to assist them to understand the referral process as well as the identification & services offered through the public schools. Parents are encouraged to meet with the special education team members to ask questions. The Dir. of Special Education/Special Education Supervisor is available to families, staff & knows all of the students who require specialized instruction. Brooklyn is a small enough district that our staff really know the students and families. When children are being referred from Birth-3 a home visit is conducted which develops the relationship with the family & promotes a positive transition to school. The staff at BPS works collaboratively with families to promote positive attendance patterns. We work to build relationships to support families & students to have good attendance. Staff members meet/notify families early if there are signs of absences that could lead to truancy. We look for the root causes of attendance issues & try to support families. When a student is absent the district contacts the family to follow up on absences if they have not heard about the reason for absence. Administration works with students & families at a young age to communicate the importance of regular attendance. Good attendance is celebrated for all students & for students with truancy concerns are praised for their attendance improvements. We strive to create a positive relationship and support families to get their children to school when there are challenges. Parents of preschoolers are invited into the school to meet the staff & visit the program. They have a special open house before school starts to assist with this big transition for preschool and kindergarten students! As children move through the grades, parents remain a part of their school life in Brooklyn. Students who transition from elementary to middle school also have a visit planned. They tour the new school & meet the staff. Student leaders assist during this visit. The middle school mentors work with students at the elementary level, building a strong relationship between schools & providing a point of contact as the students move from elementary to middle school. Each year student transitions are planned & parents are informed about the visits. Parents play an active role in student life at Brooklyn Elementary /Brooklyn Middle School. School events are well attended & informational meetings are offered on different topics over the years. Parental involvement is encouraged. The very active Brooklyn PTO works with both the elementary/ middle schools so families are included.

Efforts to Reduce Racial, Ethnic and Economic Isolation

Brooklyn Public Schools treats all students as equals and celebrates individuality and differences in the classroom as well as in the school. We are engaged in an interdistrict program in grade 3 that is offered through EASTCONN, our RESC. Classroom instruction and the curriculum promote well-rounded and educated students about people from all races, ethnic and economic backgrounds. The administration has engaged in professional development and conversation about how to increase diversity and raise awareness of unconscious bias in ourselves and in our schools.

Instruction begins in preschool and kindergarten with a NAEYC accredited program and this good instruction follows through to grade 8. In addition to the curriculum, teachers look for teachable moments to broaden student awareness and acceptance of everyone. Students learn about racial, ethnic, and economic differences through their related arts and core area classes. Students were engaged in multiple interdistrict grant opportunities and geography fair that increases their understanding of differences. ELA Units include social action that drives efforts to understand the world beyond Brooklyn Schools. Social studies lessons at the middle school teaches about immigrants and what life is like for those who were not born citizens of the United States. Likewise, texts are selected to raise social awareness related to race, ethnicity, and economic status.

Staff at both schools have been discussing the importance of increasing awareness of racial, ethnic, and economic bias and increasing awareness of implicit bias. Literature has been purchased for students and staff book studies to prompt conversations about these topics. The schools look for ways to celebrate diversity in age-appropriate ways. The middle school has a diversity club that celebrates differences and works to address the acceptance of all students. The elementary school also celebrates differences through themed events.

Equitable Allocation of Resources among District Schools

Allocation of resources is equitable across the district to meet the needs of students at all levels in each school. The leadership team meets to make and review requests for their own programming and that of the other schools. The team works together to determine what is needed and what would be considered priorities. Teachers are provided an opportunity to make requests about instructional materials and support they need to instruct and address student diversity. The BOE supports building-based budgeting and the community is supportive of education in Brooklyn. Over the years, different buildings have been able to build up different programs and supplies by working together to identify what the needs are and which of those needs should be funded first while creating a responsible and balanced budget. As the needs change, we have been able to allocate resources evenly based on needs. Administrators and teachers have the supplies and instructional materials needed to teach the curriculum they are using. All students have equal access to the curriculum and support needed to learn. Any new or additional grant funds are allocated based on needs identified by assessments & purpose.
