District Performance Index (DPI)

A District Performance Index (DPI) is the average performance of students in a subject area (i.e., ELA, Mathematics or Science) on the state summative assessments. The DPI ranges from 0-100. A DPI is reported for all students tested in a district and for students in each individual student group. Connecticut's ultimate target for a DPI is 75.

Equitable Allocation of Resources among District Schools

East Haddam Public Schools allocate district resources through a comprehensive and equitable process to ensure student needs are met. Staff, teachers, and administration begin by assessing the needs of students across the district, considering demographics, academic performance, socioeconomic status, special needs, disabilities, and English learning requirements

Based on this thorough assessment, the administration prepares a budget plan that details how resources will be distributed among schools and programs to address identified needs effectively. This plan ensures that each school receives an equitable share of resources tailored to its specific student population

Resource allocation is monitored and adjusted as needed throughout the year to respond to changing student needs and circumstances. This adaptive approach ensures that the support provided remains relevant and effective.
